

# Top 20 LMS Software

based on  
**USER EXPERIENCE**

## METHODOLOGY

This Top 20 LMS list has been planned following a holistic approach based on input from actual users who were willing to share their experience with the LMS. The reviews have been verified one by one by eLearning Industry.

The order of appearance is a function of the following metrics:

**System Usability Scale:** The most widely used and validated metric for measuring ease of use.

**Perceived Usefulness:** The degree to which a user considers that the LMS maximizes their work performance.

**Net Promoter Score (NPS):** The metric that quantifies on a 1-10 scale how much users are likely to recommend the product or not.

Our methodology was developed in collaboration with Dr. Panagiotis Zahariza who is a scientific collaborator of eLearning Industry INC and UX expert.

### System Usability Scale
