

5 TIPS TO BOOST 8TH GRADE MATH SKILLS

Finding Maths Tough this Session? Think again! Try these tips to enhance yours mathematical skills and raise the bar.

EMBRACE THE BASICS

Want your kid to excel in maths ? Focus on the basics. make them learn tables and other hacks like roots and squares. It not only saves time, but makes the brain sharper.

MOTIVATIONAL MODEL

Analyze what are the mathematical standards that an 8th class student should follow. Spend some time revising them. Sit with your kid and struggle with to solve the problems they find tough. Your motivation + students's interest = Sharp Math Skills

WORD PROBLEM DILEMMA

Not all of us are sharp enough to read a paragraph of situation and find out what mathematical solution does it demand. Help them analyze the situations practically as they are implemented by us in real life.

CALCULATED HACKS

Sit with your kid and make them realize how maths can be useful in future. show them how you measure your clothe while stitching, or bargain with the vendors while shopping. Architecture, engineering, finance, business, let them know, what wonders maths can do.

LINEAR EQUATIONS

Make sure your kid understands the importance of algebra and solving equations. Sit with them and help them grow their math skills.
