

RESPONSIVE WEB DESIGN

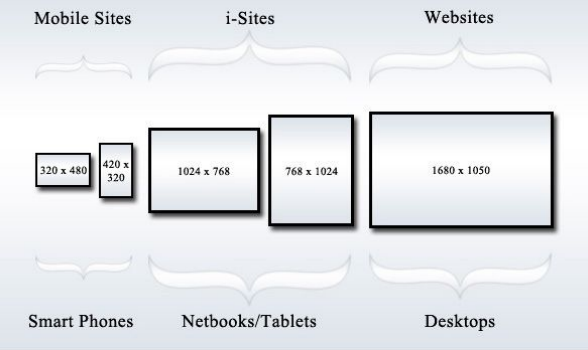

CONTENT IS LIKE WATER

The content published in website can be seen intact in desktop version. But, the viewing experience should not be compromised when viewed via smart phones, tablets, laptops, I pads.

USE RESPONSIVE MEDIA

The vista of viewing Media like Images, GIFs or Videos on different devices should not be overlooked.

← Recommended by Google! →

Goole gives more preference to the pages that are designed in a responsive manner because it is flexible and improves the user experience. This is where the Google's algorithm Hummingbird takes charge.

WHY RESPONSIVE WEB DESIGN?

- Google gives more preference to the web pages that are responsive
- Responsive websites rank better in search engines of different devices.
- Internet are surfed more often using smartphones and tablets rather than Desktops.
- It improves the user experience and qualifies Google's Hummingbird Algorithm
- Saves bandwidth and server space.
