

Accessibility in Education

6.6M

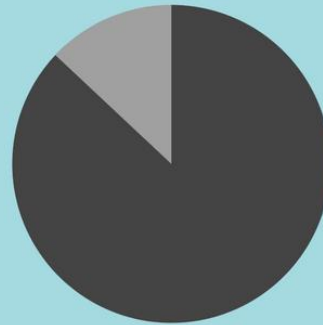

Students in the US aged 3-21 receive special education services.*

*National Center for Education Statistics: https://nces.ed.gov/programs/coe/indicator_cgg.asp

That's

13%

of the entire student body of US public schools.

87%

Yet

37%

of Americans feel that schools don't effectively test for learning disabilities.*

“

If learning materials are not accessible to learners, then learners' abilities won't be accessible to educators. ”
